Donau Soja
code of inspection body
IT - DS – 01

WHO WE ARE

CSQA is a certification and inspection company formed in Italy in 1990 from a long established and prestigious institute of biotechnology.

The certification of the Italian farm food sector begun with CSQA, which was the first institution to be accredited by the National accreditation body (Accredia) and authorized by the Ministry of Agriculture for the monitoring of products with Registered Designation of Origin (PDO, PGI, TSG).

The focus on the farm-food sector naturally led CSQA into complimentary and closely linked areas, such as forestry and sustainability. Today it has more than 10 millions Euros of sales volume, operating in 17 Nations.

OUR SERVICES

For a company that wants to reassure customers about the quality and safety of their products, CSQA offers several certification services:

- ISO standards (ISO 22000, ISO 9001, ISO 22005, ISO 14001)
- Retail standards (GSFS-BRC, IFS, IFA/Global G.A.P, QS)
- Product certification and traceability
- Taylor made inspection programmes and certification standards-

These tools provide good support to businesses and they are recognized by the market. Now we take over inspections according to the Danube Soya standard.
