

WHAT IS THE DONAU SOJA PROTEIN PARTNERSHIP?

Protein Partnerships are designed to **increase volumes of sustainably produced soybeans in Europe**, especially outside the EU (Serbia, Croatia, Moldova, Ukraine, Bosnia & Herzegovina)

Protein Partners support:

- **Training of farmers** for Best Practice in soya cultivation → better yields, more income for farmers and at the same time better quality and social & environmental standards implemented
 - By covering the cost of **certification of farmers and agricultural collectors**
 - Better **market access** to both non GM & sustainable markets for producers
- **Sustainably produced soybeans are easily available** for crushers and traders on the European market, leading to lower Non-GMO margins
- **Costs are relatively low**, depending on size of projects, farmers and volumes

Field Days

Trainings

Soya production/certification

In cooperation with

AUSTRIAN
DEVELOPMENT
AGENCY

and ACT commodities as exclusive partner in sales
