Status	Version 02: this version is based on R 06, Version 06 and was released by the Board on 29 April 2019

1 Incoming produce

- 1.1 The type and quantity of raw materials and components purchased and used shall be consistently documented using appropriate accompanying shipping documents (delivery notes, invoices), including the complete and correct quality label “Donau Soja”, and shall be open to inspection.
- 1.2 A valid Donau Soja certificate from each supplying Donau Soja supplier shall be open to inspection.
- 1.3 All soya components or all animal products that were produced using soya beans as animal feed shall comply with the Donau Soja requirements. In addition, all components shall comply with the non-GM requirements.

2 Processing, storage and packing

- 2.1 The certification body shall have access to and power of audit in all relevant areas of the processor's/marketer's premises.
- 2.2 Acceptance of produce, storage as well as the internal transportation of Donau Soja produce shall be segregated in either space or time from other produce not labelled as Donau Soja.
- 2.3 Use of equipment for processing Donau Soja produce shall be segregated in either space or time from other produce not labelled as Donau Soja.
- 2.4 Standard operating procedures for spatial or chronological segregation of the flows of produce shall be available on site, and compliance with these procedures shall be documented on site.
- 2.5 GM soya beans may not be processed or stored throughout the entire site.

3 Documentation and record keeping

- 3.1 All staff in the areas of incoming produce, storage, processing, packing, transportation and outgoing produce have been appropriately trained in complying with relevant standard operating procedures.
- 3.2 A description of the company as well as a site plan of the plant, an organisational chart and a product flow diagram shall be available.
- 3.3 A complete list of raw materials and suppliers shall be available.
- 3.4 All certification-relevant formulations and/or lot records shall be available for quantitative flow calculation.
- 3.5 A product range list of certified Donau Soja products is available.
- 3.6 A complete list of customers, indicating which customers have received which lots, shall be available at any time.
- 3.7 Not only incoming and outgoing produce, but also stocks and produce entering or leaving storage premises shall be quantified and recorded.

4 Outgoing produce, product labelling

- 4.1 The type and quantity of processed products as well as their buyers shall be precisely documented in the outgoing produce department.
- 4.2 The product name appearing on accompanying shipping documents (outgoing invoices or delivery notes) shall include "Donau Soja". In animal products, the product name shall include "fed with Donau Soja".
- 4.3 The registered brand "Donau Soja" or "fed with Donau Soja" may only be used if the following criteria are met:
 - soya (components), products containing soya (components), and animal products that were produced using soya beans as animal feed component shall be of 100 % certified Donau Soja quality;

Exemption: If the availability of individual soya components such as soya lecithin in sufficient quality cannot be ensured by at least two independent providers, other components certified as GM-free may be used on application and with the written consent of the Donau Soja Board.

- animal-based raw materials (e.g. meat, eggs, milk, ...) shall comply with the required minimum percentage of soya beans in the entire feed ration (see Requirements R 06a);

If a dairy company (working with several milk suppliers) wishes to label their products as "Donau Soja", they have to make sure that at least 20 % of the milk comes from cows being fed on the minimum amount of soya (see Requirements R 06a).

5 Quantitative flow monitoring

- 5.1 Quantitative flow shall be monitored based on actual incoming produce and produce leaving for sale or production use. The certification body shall be entitled to request and inspect individual delivery notes and invoices. The quantities shall match with due regard to the formulations used and the lot records.

6 Donau Soja Contract

- 6.1 The company shall conclude a Donau Soja contract with Donau Soja Organisation on the requirements to be met.

7 Directly commissioned inspections

- 7.1 The company shall conclude an inspection contract with a certification body recognised by Donau Soja Organisation, commissioning this body to undertake chargeable inspections to verify compliance with the Donau Soja Guidelines.
- 7.2 The Donau Soja audit shall be conducted at least once a year. Whenever possible, Donau Soja audits and certifications shall always be conducted together and in combination with non-GM inspections.
- 7.3 If the certified company suspends or terminates their Donau Soja activity, Donau Soja Organisation may, at the expense of the company demand a final inspection by the directly commissioned certification body to verify all conformities from the last audit to the date of termination of the contract. The scope of the final inspection shall be reduced compared to a normal inspection, whereby the exact scope shall be determined by Donau Soja Organisation, if necessary after consultation with the directly commissioned certification body.

8 Supervisory inspections

- 8.1 The company shall accept supervisory inspections (risk-based sampling) by inspection bodies or inspectors commissioned by Donau Soja Organisation.
