

**ANNEX 06, Version 01**

**Requirements for producing arable crops other than soya under the Europe Soya principles and requirements**

|            |   |
|------------|---|
| Purpose    | Specify the requirements for declaring and/or labelling arable crops other than soya that are produced, traded and certified in full compliance with the Europe Soya principles and requirements. The requirements cover the entire value chain from the farmer producing the arable crops to the final product.<br>This Annex can be considered as an additional module to the Europe Soya Guidelines.   |
| Definition | Europe Soya multi-crop: unprocessed or processed arable crops other than soya that are produced, traded and certified in full compliance with the Europe Soya principles and requirements; product consisting of or containing such arable crops<br>Europe Soya principles and requirements: all requirements of the Europe Soya Guidelines including Annex 06<br>Europe Soya produce: Europe Soya soya beans, Europe Soya soya products or products consisting of or containing Europe Soya soya beans |
| Outline    | 1 Requirements .....1<br>2 Directly commissioned inspections.....2<br>3 Risk-based approach .....2  |
| Status     | Version 01: released by the Board on 23 June 2022   |

**1 Requirements**

- 1.1 The Europe Soya Guidelines can be fully applied to arable crops other than soya. Arable crops other than soya may be declared as Europe Soya multi-crop if they are produced, traded, inspected and certified in accordance with the requirements of the Europe Soya Guidelines, as applicable, including this Annex.
- 1.2 An organisation or an individual company may apply for the declaration and/or labelling of an arable crop other than soya that is produced under Europe Soya multi-crop requirements by submitting a written application to Donau Soja Organisation.
- 1.3 Based on this application, a detailed project description shall be prepared and agreed between Donau Soja Organisation and the company applying for the Europe Soya multi-crop certification. The project description shall contain at least the following elements:
  - o a complete list of all types of arable crops (e.g. fava beans, rapeseed) to be declared as Europe Soya multi-crop;
  - o a clear definition of project partners/participants and their suppliers (company name, position in the value chain);

- determination of the applicability of the Europe Soya requirements and necessary amendments of these requirements resulting from the different conditions for arable crops other than soya;
  - amount and scheme of the Europe Soya multi-crop licence fees, if different from the usual Europe Soya licence fee scheme.
- 1.4 All Europe Soya arable crops other than soya shall be separated both physically and technically from all other qualities in the areas of incoming produce, storage, processing and outgoing produce.
- 1.5 The quantitative flow of Europe Soya arable crops other than soya shall be monitored based on actual incoming produce and produce leaving for sale or production use (calculation of the quantitative flow). The certification body shall be entitled to request and inspect individual delivery notes and invoices.
- 1.6 The wording of the declaration shall be agreed between Donau Soja Organisation and the respective company.
- 1.7 In addition to the declaration, the produce (packaging) itself may be labelled. The label and labelling requirements shall be agreed between Donau Soja Organisation and the respective company.
- 1.8 The basis for using the agreed declaration and/or labelling (see paragraphs 1.6 and 1.7) shall be compliance with the Europe Soya multi-crop requirements.
- 1.9 The agreed Europe Soya multi-crop declaration (see paragraph 1.6) shall be indicated on all accompanying shipping documents (invoices and delivery notes).

## **2 Directly commissioned inspections**

- 2.1 Compliance with the Europe Soya principles and requirements, including the requirements of this Annex, shall be verified as part of the directly commissioned Europe Soya inspections.
- 2.2 The frequency and type of inspections (e.g. regular inspection, supervisory inspection) shall be determined individually according to the risk assessment for the respective production area of the specific arable crop and the risk assessment for the respective company in the supply chain (chain of custody risk assessment) (see Annex 04).

## **3 Risk-based approach**

- 3.1 The production area risk level (**F-RL**) shall be identified for each arable crop in the project, taking into account the risk categories according to Annex 04, paragraph 1.
- 3.2 The chain of custody risk level shall be identified individually for each project participant, depending on the company type and taking into account the risk categories according to Annex 04, paragraph 2.
